Contec.greenlight

Contec.greenlight – Photovoltaics and green roof combined. Combine the advantages of green roofs and PV systems with the sophisticated elevation system for the unique EnergyGreenRoof.

Advantages

- Penetration-free, ballast through green roofs
- Quick & easy assembly
- Optimal use of roof space
- No yield loss due to shading of the plants
- Module height lower edge min. 30 cm from substrate
- Snow slides quickly
- No jam heat

Facts

Plate dimension	1980 x 980 x 60 mm
Net weight p. unit	12 kg
Water storage volume	39.5 liters, unfilled
Module inclination	10°, 15°, 20° standard (optional)
Material	Recycle HDPE, magnelis, aluminum, stainless steel and steel galvanized
Alignment	East, west or south

Field of application/service

The Contec.greenlight is suitable for greened flat roofs. We calculate and draw all the necessary details such as wind suction, ballasting, panel spacing and the installation plan.
